Introducing...

Rust 101

A Rust university course

Henk Oordt - henk@tweedegolf.com

tweede golf

Why?

```rust
1   let mut reasoning = "Rust is great and all, but...".to_owned();
2
3   loop {
4       reasoning.push_str("There aren't yet a lot of jobs, because...");
5
6       reasoning.push_str("Companies are hesitant to use it, because...");
7
8       reasoning.push_str("They can't find developers that have learned it, because...");
9   }
```

We need to `break` this cycle!

How?

By sparking students' imagination

and that of professors, of course

What?

- Uni course
- Practical, hands-on experience
- Introducing Rust from scratch
- Focused on the 'Why' of Rust

Open source and ready to use

What?

- 10 modules
- 9 lectures
- 9 tutorials
- 1 final project

What?

- From basics
- via ownership, ecosystem,
- to `unsafe` and FFI

Who?

- Know what pointers are
- Eager to get productive with Rust

Or if you know Rust already, but want to polish your knowledge

Wanna try it out?

- Pilot 1 module (lecture + turorial)
- ~ November/December
- at our office in Nijmegen
